Abirami Balamurugan

FULL STACK DEVELOPER

Chennai | 9884155694 | abirami5002@gmail.com| LinkedIn: https://www.linkedin.com/in/abirami-arunkanth-1969a11a2 | Portfolio: https://ABIARUN-54.github.io/portfolio | GitHub: https://github.com/ABIARUN-54

SUMMARY

Full Stack Developer with 3 years of experience building scalable web applications and automation solutions. Skilled in Python, Django, Laravel, and REST APIs with strong frontend development experience. Proven ability to optimize performance, automate workflows, and deliver high-quality, reliable applications.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, PHP
- **Frontend:** HTML5, CSS3, Bootstrap, AngularJS, ReactJS
- **Backend:** Django, Django REST Framework, Laravel
- **Database:** MySQL
- **Tools:** Git, Linux, Postman
- **Concepts:** REST APIs, CRUD Operations, MVC Architecture, Query Optimization, CRON Jobs

EXPERIENCE

Netaxis IT Solutions | Junior Full Stack Developer **2021-2024**

- Developed and delivered multiple full-stack web applications, improving system reliability and feature delivery
- Built **scalable backend services** using Django and REST APIs
- Designed responsive UI components, improving user experience and reducing UI issues
- Optimized **MySQL queries**, reducing response time by **~30–40%**
- Automated network configuration processes using Python scripts, reducing manual effort by **~60%**
- Resolved **critical production bugs**, improving application stability
- Collaborated with cross-functional teams to deliver features within tight deadlines

PROJECTS

1. Name Page Project

Tech: Laravel, PHP, MySQL, JavaScript, AngularJS

- Developed **Email Signature module**, enabling dynamic creation and management of email signatures
- Built **Contact Management system (CRUD)** for efficient data handling
- Designed **Campaign module using CRON jobs**, enabling automated email scheduling
- Optimized database queries, improving performance by **~40%**
- Fixed high-priority issues and enhanced system stability
- Delivered new features aligned with client requirements

---

2. Crowd Phrase Project

Tech: Python, MySQL, JavaScript, AngularJS

- Developed a **text translation platform** for processing and returning translated files
- Improved processing efficiency by **~30%** through backend optimization
- Debugged and resolved recurring issues, improving system reliability

---

3. RSS Feed Project

Tech: Laravel, PHP, MySQL, JavaScript, AngularJS

- Built functionality to **extract and display RSS feed data**
- Improved data processing speed by **~35%**
- Optimized queries and resolved performance bottlenecks

EDUCATION

- **Bachelor of Technology (Information Technology)**
  Jeppiaar SRR Engineering College | 2019

CERTIFICATIONS

- Python Certification
- Full Stack Development Course

STRENGTHS

- Strong debugging and problem-solving skills
- Quick learner with adaptability to new technologies
- Solid understanding of backend systems and automation
